Fruit and Ornamental Nursery Stock — Miscellaneous Supplies

February 1, 1944

GENERAL INSTRUCTIONS

WE cannot overemphasize the importance of ordering early. All orders are filled in rotation and since this is a seasonable business, the earlier you plant the better, especially with Fruits or dormant plants. All orders will be filled at the proper planting time which in the SPRING is April, May and June; in the FALL September to December.

DELIVERIES: Orders within a local area or 10 mile radius from the Nursery will be delivered free providing we have a full load or a regular delivery in that direction. Beyond this, write for special delivery rates.

GUARANTEE: All Ornamental stock is covered by the Pennsylvania Nurserymen's Association uniform retail replacement agreement as follows:

"Provided account is paid in accordance with Government credit rules, and plants receive reasonable care, we will replace at one-half price of the plants, plus cost of planting, plants planted in the spring that fail to survive the following summer, or if planted in the fall, fail to leaf out the following spring."

RATES: 1 to 9 at the each rate; 10 to 49 at the 10 rate; 50 or more at the 100 rate.

TERMS: CASH except when expressly agreed otherwise. No C. O. D. orders accepted unless accompanied by a remittance of at least one-third in Cash.

LANDSCAPE SERVICE: We are prepared to furnish plans and specifications for any sized planting or project and will plant at reasonable rates, all such orders as far as labor conditions permit.

NURSERY HOURS: Our Nursery is open week days from 8 A. M. to 9 P. M. except Wednesday and Saturday when we close at 6 P. M. **CLOSED ALL DAY SUNDAY.**

AN INVITATION is extended at all times to our customers and friends to visit our 20 acre nursery here at Shiloh and see the quality of the stock we grow.

Prices subject to change without notice.

An Outdoor Living Room
SHILOH LANDSCAPE SERVICE

THE VOGUE for beauty outside the home, as well as within, is upon us—and this new vogue finds its most charming expression in the modern outdoor living room.

In the average home building lot, there are two sizeable spaces left after the home is erected—the "front yard" and "back yard." The back yard of yesterday was anything but attractive—today it shines in resplendent new dress. The landscape architect has created the plans and the modern nursery can supply the finest and most attractive plants and shrubs which can be arranged in living walls to shut out the discordant world and create the loveliest of home pictures.

Think of what it means for your children to grow up in the environment of beautiful plants and flowers. The outdoor living room provides the ideal background for children's play, which is far better than to have them grow up on the streets.

One of the first essentials is a working plan of your prospective planting. It is not a question of how much to plant as it is, what to plant and where. Our Landscape Department will gladly draw up plans, make planting lists and offer suggestions. Call or write us for a personal interview, as we believe if we can assist you in making your surroundings more beautiful, we have made another friend, and it is only with the support of our friends that we can continue to serve.

I Love a Tree

By Samuel N. Baxter

Arboriculturist—Fairmount Park
Philadelphia

When I pass on to my reward,
Whatever that may be,
I'd like my friends to think of me
As one who loved a tree.

I may not have a statesman's poise,
Nor thrill a crowd with speech,
But I can benefit mankind
If I set out a BEECH

If I transplant a sapling OAK
To rear its mighty head,
'Twill shade and shelter those who come
Long after I am dead.

If in the park I plant an ELM,
Where children come to play,
To them 'twill be a childhood shrine
That will not soon decay.

Or if I plant a tree with fruit,
On which the birds may feed,
I've helped to foster feathered friends,
And that's a worthy deed.

For winter, when the days grow short
And spirits may run low,
I'd plant a PINE upon the 'scape,
'Twould lend a cheering glow.

I'd like a tree to mark the spot
Where I am laid to rest,
To me 'twould be the epitaph
That I would love the best.

And though not carved upon a stone
For those who come to see,
My friends would know that resting here
Is one who loved a tree.

Cl. Talisman (multicolored)	1.00
Cl. Mrs. DuPont (yellow) ..	1.00
Cl. Summer Snow (white) ..	1.00

PRICES of all 2 yr. field grown roses:

Dormant80 each—\$ 9.00 per doz.
Potted	1.00 each— 10.80 per doz.

NOTE: All patented roses and novelties are separately priced, if wanted potted, add .20 to list price.

FOR BEST RESULTS, dormant roses should not be planted after May 1st. After that date, plant potted plants only.

PEONIES

Peonies are usually planted in the fall, however if properly handled, they may be moved at any time. For spring planting, we suggest those from Clover-set pots.

EDULIS SUPERBA	Deep vivid pink
SARAH BERNHARDT	Rose pink
RICHARD CARVEL	Bright crimson
FELIX CROUSE	Ruby red
BARONESS SCHROEDER	Delicate flesh white
DUCHESS DE NEMOURES	White
Dormant 3-5 eye roots75 each
From Cloverset pots	1.00 each

TREE PEONIES

Tree Peonies are really shrubs in character, and bloom earlier than the Herbaceous types. They grow 3 to 4 feet in height and when once established bear as many as 100 blooms and last for many years.

The following prices are for strong 4 to 5 year old plants that have already bloomed in the nursery and range in height and according to variety from 12 to 24 inches.

ORIENTAL VARIETIES

No. 53 Salmon Pink	5.00
63 Salmon rose	5.00

EUROPEAN VARIETIES

No. 87 White	5.00
102 Dark Velvety red	8.00
109 Pink	5.00
111 Light salmon	5.00

Folks spend hundreds of dollars for interior decorating—why not invest a few dollars in an outside planting which everyone sees?

SUCCESSFUL PLANTING AND CARE OF NURSERY STOCK

The Success of any planting depends upon good stock, proper planting and a reasonable amount of attention thereafter. For best results, we list a few general instructions that should be carefully followed:

ARRIVAL OF STOCK All stock will be delivered at proper planting time and if you find it impossible to plant immediately, all bundles of dormant Trees, Shrubs or Roses should be opened, thoroughly watered and heeled in the ground. Never allow the roots to be exposed to the sun or air.

PLANTING Dig all holes large enough to receive the roots without crowding or doubling. Set shrubs so that there will be at least 2 inches of soil over the roots. Shade trees should have about 4 inches. Balled and Burlapped stock should be set slightly deeper than the top of the ball.

Always fill in good top soil about the roots and tamp firmly. After hole is two-thirds full plenty of water should be added and only after this has soaked away should the planting be completed. All tall Shade trees and Evergreens should be staked or guyed as soon as planted to prevent swaying by the wind and can be removed as soon as you are sure trees are established.

PRUNING This is a broad subject and rather difficult to explain briefly. All bare root trees and shrubs must be top pruned to offset the loss of some roots in digging and also to take up the shock of transplanting. Dormant Roses must be cut back to at least 4 or 6 inches of the budded joint or point of branching on the main stem. Evergreens should be pruned annually the first year after planting so as to preserve their shape, and keep them within bounds. The tall growing Evergreens such as Spruce or Pines should only be pruned on special occasions.

CARE Since all trees and plants are living subjects, they require plenty of water especially the first season after planting if the ground becomes hard and dry or the weather hot. If your soil is poor or "run down," an annual application of a good plant food is beneficial and a mulch of Peat Moss will also help to conserve moisture.

For more detailed information we will send you FREE, a valuable 48 page illustrated booklet on Correct Planting Methods and Garden Design. It is truly the best reference guide available and its yours for the asking.
